Happiness to most people is fun, good living and plenty of money of happiness were synonymous with all this, rich people with all their luxuries and countless parties would be perpetually happy. Fun is what we experience during an act, happiness is the intangible something we experience after an act. We may have fun watching a movie, going on shopping, meeting friends there are all fun activities that afford us fleeting moments of relaxation and enjoyment. Happiness on the other hand is much stronger, deeper and more abiding emotion.

#### **Unit-IV**

- 4.(a) Read the following passage carefully and answer the questions given below : [5]

Education is needed to enable the children to cope with life. We do not educate children only, for purpose of educating them, our purpose is to make them fit for life. As soon as we realize this fact, we will understand that it is very important to choose a system of education which will really prepare our children for the

realities of life. It is not enough first to choose the first system of education without examining it to see whether it is fact suitable or not, we find in some countries a large number of people with university degree refuse to do what they think 'low class' work. At this moment we have to think that an educated man is not so important as the uneducated farmer; we cannot live without food which is grown by the farmer. Thus work of farmer is more important than any other work. It is right that all of us must be educated so to choose work according to our need education gives broader view point. That should equip the person adequately to face life according to his capabilities.
